Manufactured and distributed by Ralco Nutrition, Inc. under US Patent 6,106,838 by permission from Ecopharm USA, LLC.)

What is Unique Greek Oregano? Unique Greek Oregano is a product manufactured by Ralco under US PATENT #6106838 by permission of Ecopharm Hellas, S.A. This Greek Oregano is a result of twelve years of extensive research and development including a plant breeding program that produced a hybrid variety of Oregano. This standardized Greek Oregano (*Origanum vulgare* ssp. *hirtum*) is the only available Greek Oregano product of North and South America. There are 40 species of Oregano, and only the Greek variety possesses the proper and consistent level and ratio of Carvacrol and Thymol. Greek Oregano is the only Oregano crop today which is grown and harvested under a strict quality control regimen.

Unique Soluble Fiber Soluble fiber plays an important role in healthy fermentation. Regano SP Capsules contain a unique fiber source. This fiber has the best combination of desirable characteristics of any fiber source currently available. A couple of these properties are its ability to enhance both *Lactobacillus* and *Bifidobacteria* development and its ability to stimulate immune cell production.
